 HVAC _____ Sewer _____
 Zoning District _____ Date Issued _____ Date Expires _____

Please Check One Inspection Agency: Once an applicant/homeowner/builder chooses an inspection agency on the Township List they must continue to use that agency through completion of the permitted project.

Please call your inspection agency direct to schedule your inspections.

- _____ Blue Mountain Inspection Services
 6 Old State Road, New Ringgold, Pa. 17960 - Phone 570-943-2577
- _____ CodeMaster Inspection Services
 1209 Hausman Road - Suite B, Allentown, Pa. 18104 - Phone 484-223-0763

This is a multi-use application ~ please fill in as to what applies to your project ~ Thank You

Plot Plan ~ Provide three (3) copies of a plot plan showing all existing structures, well, septic tank, drain field, sewer lines, driveway area, and proposed improvements within the lot. Exact dimensions and setbacks must be shown if improvements are proposed less than ten (10) feet from the required setbacks.

Construction Plans

Residential ~ Three (3) sets of construction plans must be "as built" indicating all the information of the Pa. UCC Code, including the square footage of the total floor area of the structure (living area, basement, finished attic, garages, decks and porches).

Additions to residential dwellings only ~ if no construction plans are drafted, the Building Inspector may approve a list of materials to be used if the load strengths can be determined by the identification of the rafters, joist, and the spacing of each. A hand drawn plan is acceptable.

Commercial Structures ~ Three (3) sets of construction plans; the construction documents shall be prepared by a registered design professional and be signed and sealed. The floor area utilized by the public must be shown separately from the total square footage of the building area.

Provide a brief description of work to be done:

The applicant certifies that all information on this application is correct and the work will be completed in accordance with the "approved" construction documents and PA Act 45 (Uniform Construction Code) and any additional approved building code requirements adopted by the Municipality. The property owner and applicant assumes the responsibility of location all property lines, setback lines, easements, rights of way, flood areas, etc. Issuance of permit and approval of construction documents shall not be construed as authority to violate, cancel or set aside any provisions of the codes or ordinances of the Municipality or any other governing body. The applicant certifies he/she understands all the applicable codes, ordinances and regulations.

Application for a permit shall be made by the owner or lessee of the building or structure, or agent of either, or by the registered design professional employed in connection with the proposed work. I certify that the code administrator or the code administrator's authorized representative shall have the authority to enter areas covered by such permit at any reasonable hour to enforce the provisions of the code(s) applicable to such permit.

My signature below certifies that I am aware of my responsibility to have each required inspection done. No Certificate of Occupancy shall be issued without the required inspections having been completed.

Heidelberg Township

PA Act 45 (Uniform Construction Code) Permit Application Addendum for Title 25, Chapter 102 Compliance

In accordance with PA Code Title 25 Chapter 102, Erosion and Sedimentation Control, and the necessity of Heidelberg Township and the Department of Environmental Protection through the Lehigh County Conservation District, to control accelerated erosion and minimize sediment pollution to waters of the Commonwealth, the following questions shall be answered to the best of your knowledge:

1. Does this proposed construction/project result in earth disturbance of five thousand (5,000) Square Feet or more? Yes / No
2. What is the anticipated total area of disturbance?

If the total area of earth disturbance is 5,000 SF or more, an Erosion and Sedimentation Control Plan must be prepared and remain on site during the entire project. This plan shall meet the requirements set forth by the Code and the Lehigh County Conservation District. This plan will need to be available for review during the entire project. This plan will be utilized by the LCCD or Heidelberg Township during site inspections of the project. Failure to have an Erosion and Sedimentation Control Plan, and implement the Erosion and Sedimentation Controls as indicated on the plan, is a violation of Chapter 102, and enforceable by the LCCD at any time.

3. Does the proposed construction/project result in earth disturbance of one (1.0) acre or more? Yes / No
3. What is the anticipated total area of disturbance?

If the total area of earth disturbance is 1 acre or more, a National Pollution Discharge Elimination System (NPDES) permit is required. The complexity of the Application is dependent on the receiving stream classification. The permit application and plans shall meet the requirements set forth by the PA Code and the Lehigh County Conservation District. No permit shall be issued by the Zoning Office until the NPDES permit is issued. This plan will need to be available for review during the entire project. This plan will be utilized by the LCCD or Heidelberg Township during site inspections of the project. Failure to have an Erosion and Sedimentation Control Plan, and implement the Erosion and Sedimentation Controls as indicated on the plan, is a violation of Chapter 102, and enforceable by the LCCD at any time.

I have answered these questions to the best of my knowledge. I further state these are the true and correct answers to these earth disturbance questions.

ALTERNATIVE ENERGY

Windmill Installation (includes plan review, foundation inspection and electrical/final inspection) per windmill	\$120.00	Base fee
		Base Fee
		plus
Solar and Photovoltaic Panel System installations either roof or ground mounted, including electrical	\$150.00	\$5.00 per panel

Residential Construction Notes, Qualifications & Additional Services

A minimum fee of \$55.00 shall apply for each additional plan review re-submission or for incomplete or denied plans inspections only. re-inspections or additional inspections shall be invoiced at \$50.00 each.

An additional minimum fee of \$65.00 shall apply for a Certificate of Completion/Certificate of Occupancy inspection in municipalities where CodeMaster serves as Building Code Official and prior inspections have been conducted by another inspection agency.

Consultation and/or attendance at meetings with applicants, Township Officials or Staff, Building Code Board of Appeal meetings or special site visits or meetings shall be invoiced at \$65.00 per hour.

Administrative Costs: Minimum 1 hour @ \$40/hour plus fraction thereof.

All windmills, ground mounted solar panel and roof mounted solar panel installations will require a structural plan (including foundation if applicable), plan showing the loading and installation design. The plan must be signed and sealed by a structural engineer licensed in the Commonwealth of Pennsylvania.

CodeMaster may require building plans and specifications to be stamped and/or sealed by a design professional licensed in the Commonwealth of Pennsylvania. This would typically apply to non-conventional type construction or structures.

 Fax: 570.943.3031

Heidelberg Township Inspection Pricing RECIT

Residential Pricing:

Total gross square feet includes all floors, basements, crawlspaces, garages, and covered breezeways, porches, decks, or patios.

The price includes all inspections and plan review.

New Homes up to 2500 square feet \$ 15.00 per 100 square feet over 2500	\$750.00
Additions up to 2000 square feet \$ 15.00 per 100 square feet over 2000	\$630.00
Modular homes - No square foot limit	580.00
Manufactured home - On piers	450.00
Manufactured home - On full foundation	575.00 575.00
Manufactured home - On full foundation	575.00
Pole buildings or accessory structures Over 1,000 square feet as per PA UCC Law	325.00
Above ground pool or Spa	145.00
In ground pools	255.00
Decks over 30 inches above the ground	195.00
Residential Solar panels installed on a roof	225.00
Residential Solar panels installed on a ground mounted System	275.00
Residential 200 amp electric service inspection	90.00
Residential 400 amp electric service inspection	105.00
Demolition Permit	105.00

Fences above 6 feet require inspections as per the UCC regulations. There are usually 2 inspections required for fencing. Total cost for inspections and plan review is \$100.00.

Retaining walls are priced per project. The height and the design of the retaining walls determines how many inspections are required. We have had retaining walls that took 2 inspections and one that took 15 inspections.

Commercial Pricing:

New Construction and additions

The minimum fee is \$750.00, which includes the plan review. The square foot price for new projects can vary between .55 and .25 per square foot. We have decided that all commercial jobs will be quoted on a per job basis. We feel that this is better because it will be less expensive to inspect a 100,000 square foot warehouse verses a 100,000 square foot hotel. The price quoted would include all inspections and plan reviews.

All alterations to an existing building will be quoted. All alterations to a building are not the same so it is hard to set a price on an alteration. One alteration can be very easy where the next alteration at the same size can be more complex.

General

Re-inspections or additional inspections are priced at \$60.00 each.

Extra plan reviews are priced at \$60.00 per hour.

The above prices do not include the \$ 4.00 state permit fee or any postage handling fees that may be incurred.

All prices include the Certificate of Occupancy where Blue Mountain Inspection Service LLC is the BCO.

Residential Plan Submittal Guide

The construction plans shall consist of the following:

- Elevation Drawings** (Indicating the heights, and finished grade)
- Floor Plans** (Indicate all the room sizes and label their use, and the location and sizes of all the windows and doors.)
- Foundation Plan**
- Roof Framing Plan**
- Cross Section of the structure**
- Plans shall be to scale or have all the dimensions noted on the plans.**

Please submit 3 sets (unless otherwise instructed) of complete construction plans that include the following:

1. ___ **All the design criteria shall be noted on the plans.**
2. ___ **Bathroom and/or powder room fixture layout (to scale)**
3. ___ **Safety glass locations (Glass next to stairs, tub/showers, doors, floors)**
4. ___ **Fire ratings of walls and/or doors (Garages and/or Townhouse separations, exterior walls less than 5 feet from a property line)**
5. ___ **Basement and Sleeping room egress compliance (Type and size of window well if applicable)**
6. ___ **Stair (Width, landing size and location, also the step rise, and step run)**
7. ___ **Handrails (Height, size, and location)**
8. ___ **Guardrails (Height, spacing, and location)**
9. ___ **Stair lighting (Over the stairs or one at each landing)**
10. ___ **Ramps (Slope, landings, handrail, guards)**
11. ___ **Smoke detectors (Type, power source, locations)**
12. ___ **Soil type on the construction site. (Check the site soil and compare the soil to the soils table in chapter 4 of the 2006 International Residential Code.)**
13. ___ **Footing size (Including any interior piers or any other piers)**
14. ___ **Concrete (Indicate concrete strength for all concrete)**
15. ___ **Footer (Depth below frost line: 36 inch minimum)**
16. ___ **Foundation (Type, wall thickness, re-bar size & spacing, wall height, height of unbalanced fill)**
17. ___ **Type of foundation coating (Damp-proofing, water-proofing)**
18. ___ **Foundation exterior drains (With stone and an approved filter membrane)**
19. ___ **Foundation anchoring (Anchor bolts/straps, size and spacing, as well as joist clips: per section R404 of the International Residential Code 2006 edition)**
20. ___ **Sill plate (Type and size)**
21. ___ **Columns/Posts (Sizes and method of anchoring)**
22. ___ **Crawl space (Access, indicate one of the following vented or conditioned, and indicate how it will be vented or conditioned.)**
23. ___ **Concrete slab (Thickness, vapor barrier)**
24. ___ **Floor joists (Size, type, cantilever distances, and spacing)**
25. ___ **Beams (Types, sizes, spans, and loading information)**
26. ___ **Framing around openings (Indicate the number of framing members around an opening in the following systems: floor, ceiling, and roof)**

27. ___ **Floor sheathing** (Type and thickness)
28. ___ **Wall construction** (Stud size and spacing, sheathing type and size, type and location of wall wind bracing)
29. ___ **Headers** (Size and type of typical headers)
30. ___ **Window sill heights** (Any sill height less than 24 inches off the floor the window may not open greater than 4 inches, if the window sill is equal to or greater than 72 inches above the finished grade.)
31. ___ **Interior wall coverings** (Size and type of all coverings; moisture resistant wall board is not permitted in shower/tub areas, or used for a tile backer board.)
32. ___ **Exterior wall coverings** (Size and type of all coverings, provide details for masonry installations)
33. ___ **Ceiling Joists** (Size, type, and spacing)
34. ___ **Bearing walls** (All bearing walls shall be within 1 foot horizontally of the beam or bearing wall below. The loads shall stack.)
35. ___ **Roof pitches** (Indicate the pitches of all the roofs)
36. ___ **Roof rafters** (Size, type, and spacing. If trusses are to be used provide the PA engineer sealed truss designs)
37. ___ **Hip and valley rafters** (Indicate the size of all hip and valley rafters. All hip and valley rafters shall be posted down to a bearing wall or properly sized beam where the hip or valley meets the ridge.)
38. ___ **Rafter ties** (Rafter ties shall be 4 feet on center to tie the rafters together where the ceiling joists are not parallel to the rafters)
39. ___ **Structural ridge beam** (Where the ceiling joists are deleted a properly size ridge beam shall be designed)
40. ___ **Attic access** (Size and location of the opening for all attic areas)
41. ___ **Roof Sheathing** (Size, type, and thickness)
42. ___ **Roof Covering** (Felt paper, ice guard, and type of roofing material)
43. ___ **Roof ventilation** (Method of ventilation to comply with the 1/150 ratio)
44. ___ **Fireplaces** (Manufactured fireplaces, wood or gas, provide the installation instructions, if masonry provide construction details)
45. ___ **Insulation/Energy** (Provide information on which Energy path will be used, along with the design, notes, and/or calculations to support the path: 2006 IRC chapter 11, 2006 PA Alternative Energy Provisions www.dli.state.pa.us, or RES-check www.doe.gov .)
46. ___ **Heating and Air Conditioning** (Provide heating, ventilation, and air conditioning information, locations, and designs, including the type of fuel and efficiencies. All appliances shall be listed and labeled.)
47. ___ **Gas piping** (Provide the type of piping material, appliance loads, and pipe sizing)
48. ___ **Plumbing** (Provide the type of piping and sizing for the water supply and the drainage system.)
49. ___ **Electrical** (Indicate the locations of all the switches, receptacles, lighting outlets, and appliance feeds.)
